

Season 02 Week 05

Problem Statement

Sundar, an exceptional employee at his organization, is very lazy and has very poor organizing skills which in-turn makes him lose points. He is frustrated about the scoldings and seeks out your help. You, as his friend, take pity on him and decide to help him out.

- Your task is to create a bot that organizes the files present in a particular folder into separate folders for each file type.
- For instance, all the PDF files are to be put into a folder named “PDF” and so on.

Find the link to the sample folder here: [Sample Folder](#)

Sample output:
